Issuing of authorisation does not imply the Organizer will accept liability or release participants from responsibility for operation of aforementioned machinery. Participants must therefore take all precautions necessary to prevent accidents and fires, reduce noise, eliminate odours and avoid gas emissions. Under no circumstances may machinery or equipment involving the use of fire be operated. Machinery must in no way constitute a hazard or disturbance to others.

The Organizer reserves the final right to revoke the aforesaid authorisation if it considers that inconvenience of any type could occur.

If machinery or equipment are required to comply with current laws and regulations, exhibitors must have them examined at their own expense and obtain relevant approval from the competent authorities.

In this regard, exhibitors of this type of machinery and equipment declare they are in compliance with the aforesaid Directive when they sign the application form, thereby releasing Rimini Fiera S.p.A. from any ensuing liability.

REGULATION OF NOISE LEVELS ON EXHIBITION PREMISES

Art. 26 - As a rule, exhibitors are not allowed to use audio reproduction equipment to broadcast music and sound. Any exceptions must be authorised by the Organizer, but this does not exempt participants from complying at their own expense with current laws regarding performing rights, according to which they assume all responsibility in any case.

Exhibiting companies who have required to the Organizer to use sound reinforcement equipment, also for the use of public address equipment like microphones, speakers, etc, must use said equipment in such a way as to ensure a noise level that allows a suitable ambiance for conducting business and therefore lower than levels in force (Legislative Decree 81/2008, Title VIII, Chapter II). In any case, the noise level set by the Organizer requires it to be less than 80 db at all times.

Specifically, the sound diffusion should be separated from the light plant and the rest of the electrical equipment. The sound diffusion should be directed towards the inside of the stand only

Moreover, at its sole and exclusive discretion, the Organizer may decide that the sound levels produced by various apparatus or machinery on the exhibitor's stand appears to be dangerous and/or annoying for the activities being pursued by other operators in the vicinity, and consequently invite (via a written or verbal notification made by one of its staff) an exhibitor to reduce noise to levels even lower than the decibels indicated herein. Sound levels will be measured by sound meters at the nearest possible point outside the stand area by Organizer's authorised staff.

Failure to comply with the aforesaid dispositions, including the request to reduce noise to levels lower than those specified in the second paragraph above, will give rise to the following actions against the defaulting exhibitor:

- for the first infringement notified, a verbal warning;
- for the second infringement, a written warning;
- from the third infringement onwards, the stand's electricity supply will be disconnected and the exhibitor is not entitled to refunds or compensation. A warning will be given 15 minutes before power is disconnected and may last for up to 3 hours, depending on the final decision taken by the Organizer.

In none of the aforementioned cases may Rimini Fiera S.p.A. be held responsible for any damage caused to the exhibitor and/or material exhibited when envisaged sanctions are applied following the exhibitor's failure to comply with the provisions herein.

Without prejudice to the abovementioned regulations and without prejudice to Rimini Fiera's commitment to ensuring exhibitors comply with these provisions, Rimini Fiera S.p.A. cannot be held responsible in any way if an exhibitor's illicit behaviour causes damage to other participants. Any such controversies must be resolved directly by the exhibitors in question and Rimini Fiera S.p.A. is released from any obligation and/or responsibility.
